

I am writing to object to the issue of LPFM and how it will affect the station that I listen to daily, KLOVE at FM91.1 in Denver, CO. This station provides spiritual support to thousands of people around the country and on the internet to thousands more around the world. They provide information to the local community by letting us know where help is and about Christian concerts in the area, and events that are Christian focused. Without this station, the community would be missing an important part of community events and prayer and music that is uplifting and a pleasure to listen to for each individual. There are no commercials, no cussing, no inappropriate speech. It does not preach a specific religion, so crosses all cultures. This station is in the public interest because of all the things I have already mentioned. They do not discriminate, are nonpartisan, support everyone and provide information to all that want it. I am asking that you not pass this resolution that could potentially take away an important part of our community and that supports our loved ones around the world. Thank you. Diana Henke
